ANIMAL SCIENCE
What can I do with this major?

FARM RANGE PRODUCTION AND MANAGEMENT
Livestock Production
- Beef and Dairy Cattle, Swine, Poultry, Sheep, Horses
Livestock Feed
- Production, Development, Quality Control, Distribution/Marketing
Meat and Dairy Foods
- Production, Development, Quality Control, Distribution/Marketing

AREAS

Farm and ranch operations
Feed companies and operations
Meat and dairy processors
Processing plants
Inspection services
Extension services
Government agencies including:
  - U.S. Department of Agriculture
  - Food and Drug Administration

EMPLOYERS

Develop physical stamina, outdoor skills and comfort being in close proximity with large and small animals.
Gain work experience in area of interest through internships, summer jobs or part-time work.
Minor in business if interested in management or self-employment.
Participate in related clubs and competition teams.
Become familiar with federal job application procedure for government work.

AGRIBUSINESS
Sales
- Livestock
- Feed
- Pharmaceuticals
- Agriculture Chemicals
- Livestock Supplies
- Equipment: Farm and Feedlot Management
Marketing
Public Relations
Customer Service

Agribusinesses: livestock and feed
Pharmaceutical companies
Equipment and supply companies
Food and meat processing companies
Animal health firms
Breed organizations
Food distributors
Financial institutions
Livestock publications
Professional associations, e.g. National Cattlemen's Beef Association

STRATEGIES

Obtain relevant experience through internships.
Earn a minor in business.
Must be highly motivated and well organized.
Proven leadership abilities are desirable. Join related student organizations and seek leadership roles.
Develop a strong commitment to customer satisfaction.
Practice excellent communication skills, written and oral.
Develop computer skills especially with spreadsheet, presentation and database software.
Learn to work well both on a team and individually.
Join related clubs and become active with competition teams.

GENERAL INFORMATION

- As an undergraduate, seek laboratory experiences such as research projects, volunteering with professors, summer jobs, or internships.
- Participate in research programs and internships sponsored by government organizations and private corporations.
- Consider a certificate program or specialized master’s program to qualify for research technician positions.
- Earn master’s degree for greater variety and autonomy on the job. Earn a Ph.D. to work on high-level research projects, to direct research programs, to enter high levels of administration, and to teach at four-year post-secondary institutions. Postdoctoral fellowships may also be required.
- Learn to work independently and as part of a team.
- Combine an undergraduate degree with a degree in law, business, education, communication and information science, or other discipline to expand career opportunities.
- Consider earning an MBA after gaining work experience to reach the highest levels of agribusiness management.
- The animal sciences are good preparation for a career in healthcare such as medicine, dentistry, pharmacology, and veterinary science, but professional degrees and licenses are also necessary to practice in these fields. Become familiar with the specific entrance exam for graduate or professional schools in your area of interest.
- Join professional associations and community organizations and read related journals to stay abreast of current issues in the field and to develop networking contacts.
- Actively participate in student organizations, competition teams, research laboratories, and other related activities.
- Secure strong relationships and personal recommendations from professors and/or employers.
- Learn federal, state, and local government job application process. The federal government is the largest employer of scientists.
- Gain experience with grant writing and fundraising techniques. Often research must be funded in this manner.
