# LOGISTICS AND TRANSPORTATION

What can I do with this major?

## AREAS

**MANUFACTURING**
- Purchasing
- Operations Management
- Distribution
- Inventory/Materials Management
- Warehouse Operations
- Systems Management
- Customer Service
- Rate Analysis
- Performance Analysis

**MERCHANDISING**
- Purchasing
- Distribution
- Inventory Management
- Warehouse Operations
- Systems Management
- Supplier Sourcing
- Customer Service
- Performance Analysis

**SERVICE INSTITUTIONS**
- Purchasing
- Operations
- Systems Management
- Customer Service

## EMPLOYERS

- Manufacturers of:
  - Industrial goods
  - Consumer goods
- Retailers
- Wholesalers
- Distributors
- Service institutions including:
  - Banks
  - Financial institutions
  - Hospitals
  - Educational institutions

## STRATEGIES

- Many entry-level positions as analysts, management trainees, or first line supervisors are available with manufacturers.
- Develop strong analytical skills and a logical approach to problem solving.
- Take additional courses in statistics and computer systems.
- Learn to communicate with different types of people across different functional areas.
- Complete an internship in a manufacturing environment.

- Many entry-level positions as analysts, management trainees, or first line supervisors are available with merchandisers.
- Develop strong analytical skills and a logical approach to problem solving.
- Take additional courses in statistics and computer systems.
- Gain experience through an internship with a retailer.
- Get involved in student organizations and seek positions of leadership.

- Develop skills with computers and information technology.
- Learn to communicate well with others.
- Complete an internship in logistics to gain relevant experience.

**GENERAL INFORMATION**

- Majors in logistics, supply chain, transportation, and industrial engineering are particularly helpful to gain entry into this functional area.
- Gaining experience through part-time and summer jobs or internships is critical.
- Information technology, analytical, and quantitative skills are particularly important in the logistics and transportation field. Develop these skills through courses and work experience.
- Many desirable skills can be enhanced through participation in leadership of student organizations.
- Develop flexibility, negotiation skills, and the ability to make sound decisions.
- Learn to work well on a team and to work effectively with a wide variety of people.
- Some organizations may not have a “logistics” department. Look for positions in operations, manufacturing, or marketing.
- Plan to start searching for internships or jobs four or more months in advance of when you would like to start the position.
- Develop and utilize a personal network of contacts. Once in a position, find a mentor.
- Consider earning an MBA after gaining a few years of work experience to reach the highest levels of logistics.
